

JACOB CALLEON

Cybersecurity Engineer • **CISSP** • CompTIA Network+

Inland Empire, CA • (707) 800-8135 • jcalleon@outlook.com • linkedin.com/in/reycubcalleon

PROFESSIONAL SUMMARY

Cybersecurity Engineer with 5+ years of experience executing vulnerability management, detection engineering, and security automation across enterprise-scale environments. Proven track record designing scalable security controls aligned with CIS, NIST, PCI-DSS, and SOC 2. Skilled at integrating multi-vendor security stacks, automating remediation workflows, and driving measurable risk reduction across hybrid cloud and on-premises infrastructures.

KEY COMPONENTS

SIEM & Detection Engineering	Vulnerability Management	Security Automation	Endpoint Protection & XDR
IAM & Identity Security	CIS / NIST / PCI-DSS / SOC 2	Cloud Security (Azure)	Incident Response

KEY IMPACT METRICS

82% Reduction in Exploitable Vulnerabilities	100K+ Vulnerabilities Remediated Hybrid & On-Prem	5,000+ Systems Automated via PowerShell & APIs
90% Patch Compliance via Enterprise VM Program	10,000+ Endpoints Secured Across Environments	1,000+ Platforms Integrated into SIEM Architectures

PROFESSIONAL EXPERIENCE

Cybersecurity Engineer

Rapid Response Monitoring Services (RRMS)

Oct 2023 – Jul 2025

- Led enterprise-wide CIS hardening across Windows and Linux systems, reducing exploitable vulnerabilities by 82%
- Built and implemented SIEM-integrated detection pipelines across Splunk, ELK, and Graylog
- Integrated Cortex XDR, CrowdStrike, SentinelOne, and ESET into a centralized detection and response architecture
- Automated vulnerability remediation validation using PowerShell and Qualys APIs across 5,000+ systems
- Built and deployed phishing simulation, email security, and DLP programs aligned to enterprise compliance requirements
- Improved threat visibility and detection coverage across multi-source telemetry environments

IT Infrastructure Consultant & Independent Practice

Self-Employed

Aug 2025 – Present

- Maintained active security lab environment running detection engineering pipelines, Intune MDM, and SIEM integrations; used for continuous skills development and staying current with threat tooling
- Provided freelance cybersecurity and IT advisory to small business clients, applying enterprise-grade process at smaller scale

System Administrator (Security-Focused)

The Smart Circle

Feb 2023 – Sep 2023

- Designed and implemented enterprise vulnerability management program using Tenable and KACE
- Achieved 90% patch compliance across Windows and Linux systems
- Led migration of 1,500+ endpoints to CrowdStrike Falcon, improving endpoint detection capabilities
- Implemented IAM and credential management solutions including Okta, Atlassian, and IPassword
- Designed disaster recovery and business continuity strategies for critical systems

Network Engineer (MSP)

InSync Computer Solutions

Jun 2022 – Jan 2023

- Secured 10,000+ endpoints across multiple client environments through layered security controls
- Delivered vulnerability remediation and infrastructure hardening across diverse network environments
- Maintained service reliability and resolved infrastructure and security incidents at scale

IT & Security Support

Apple | Keeco | SilverVentures | Apogee

2020 – 2022

- Supported 1,000+ users across enterprise environments, resolving complex infrastructure issues with strong first-call resolution
- Managed identity lifecycle for 700+ users and enforced endpoint security controls across Active Directory environments
- Improved technical support efficiency by 500% and reduced recurring incidents through root cause analysis and documentation

EDUCATION

M.S. Cybersecurity Management — Infrastructure & Systems Security Concentration | Purdue University GPA: 3.92 / 4.0

B.S. Cybersecurity — Purdue University Magna Cum Laude

CERTIFICATIONS & COMPETITIONS

CISSP — Certified Information Systems Security Professional (Active)

CompTIA Network+ (Renewal In Progress)

- Top Ranking Globally — Hivestorm & CCDC Cyber Defense Competition: network defense under live attack scenarios
- CTFs – NCL, HTB, etc. – network traffic analysis, intrusion detection, and incident response using Wireshark and CLI tools

TECHNICAL SKILLS

Security Engineering SIEM, XDR, Detection Engineering, Incident Response	Vulnerability Management Qualys, Tenable, Risk Reduction, Patch Management
Infrastructure Security Windows, Linux, CIS Hardening, IAM	Detection & Analytics IOC/IOA Development, Log Analysis, Threat Intelligence
Automation PowerShell, Python, API Integration	Cloud Security Azure Security, Conditional Access, IAM, Terraform
Frameworks CIS v8, NIST CSF, PCI-DSS, SOC 2	Platforms Splunk, ELK, Graylog, Cortex XDR, CrowdStrike, SentinelOne, Okta
